

SAFE T PLACE™

Make your business, school, house of worship and more - a safe place. You have heard “wear a mask, keep your distance, and sanitize your hands” to keep places safe. Now there is Safe T Place to make your places much safer!

According to the CDC, the first sign of viral infection may be a temperature of 100.4 or higher, before other symptoms. Safe T Place is a unique product that while you sanitize your hands accurately displays your temperature and sounds a soft but noticeable chiming if the temperature is 100.4 or higher!

The Safe T Place is an essential part of both keeping your place safer – protecting your employees, schools, houses of worship, and even shops and restaurants safer. The Safe T Place standing in your facility reminds people that you care and that your place is a safer place.

Safe T Place technology is scientific: The wrist is like your forehead – almost no fat or muscle tissue under the skin and warm blood supply flowing over bone. A thermometer is actually reading your blood temperature. When taking an external temperature the forehead and wrist are optimum.

Safe T Place utilizes a fast FDA approved liquid sanitizer that evaporates in seconds – no messy gels or foams. Safe T Place can be mounted on a wall and comes with a floor mount for convenient placement without drilling into walls. The stand is adjustable for the preferred height and the location for your clientele, including children or handicapped.

The Safe T Place is assurance that you care enough to provide a safe and effective place. Make your places even safer with Safe T Place.
